General Assistance

General Assistance statistics provided in the Bulletin cover municipalities with population in excess of 20,000 and all county welfare units and district administration boards. Together, they account for 54 reporting units covering about 88 percent of the total caseload in Ontario.

The caseload in March 1978 was 63,570 or 11.5 percent higher than in March 1977. The highest rates of increase were among employables, with single females showing a 38.4 percent increase and single males 27.7 percent.

Twelve-months cumulative expenditures ending March 1978 amounted to \$134.4 million or 14.8 percent more than the previous 12 months ending March 1977.

The breakdown by the Ministry's 19 administrative districts showed increases in the quarterly averages of beneficiaries in 15 districts in the fourth fiscal quarter ending March 1978 as compared with the corresponding quarter ending March 1977. The most noticeable increases were in Kirkland Lake (20.6 percent), Cornwall (18.9 percent) and Sudbury (14.6 percent). The largest rates of decline were in Thunder Bay (12.5 percent) and Keewatin-Kenora (5.0 percent).

Supplementary Aid showed an increase in quarterly averages of beneficiaries in 10 districts with an overall quarterly average increase of 10.9 percent, accompanied by an 18.1 percent rise in total expenditures.

Special Assistance showed an increase in quarterly averages of beneficiaries in 12 districts with an overall increase of 45.9 percent. Total expenditures increased by 26.5 percent.

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average 1.6 percent in March 1978. This ranged from a low of 0.4 percent in Perth to a high of 4.2 percent in Prescott and Russell. In the largest administrative units, the percentages were 2.0 in Toronto, 1.3 in Ottawa-Carleton, 2.3 in Hamilton-Wentworth and 1.9 in Niagara.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in March 1978 was 112,553 or 3.2 percent higher than the year before. During this period, there was a 4.1 percent decline among recipients covered by the Guaranteed Annual Income System (GAINS) and a 7.5 percent increase among recipients not covered by GAINS. In the latter group, the highest increases were among couples (22.7 percent) and singles (13.9 percent).

Twelve-months cumulative expenditures ending March 1978 amounted to \$368.6 million or 11.1 percent more than the previous 12 months ending March 1977. More specifically, expenditures on recipients without GAINS increased by 15.2 percent, while expenditures on recipients under GAINS rose only by 3.7 percent.

The provincial average of beneficiaries as a percentage of the assessed population was 2.8 percent in March 1978. This ranged from a low of 1.0 percent in Peel and Halton to a high of 8.3 percent in Manitoulin. In the largest administrative units, Toronto had 2.5 percent and Ottawa-Carleton 2.6 percent—both slightly below the provincial average. Hamilton-Wentworth at 4.1 percent and Niagara at 3.4 percent were above the provincial average.

The consolidation of General Assistance and Family Benefits beneficiaries as a percentage of the assessed population refers to the 54 larger reporting units. In March 1978, the overall average was 4.3 percent, ranging from a low of 1.5 percent in Perth to a high of 11.9 percent in Nipissing (excluding North Bay) and 9.3 percent in Prescott and Russell. In the largest units, Toronto with 4.5 percent was slightly higher than the provincial average, while Ottawa-Carleton with 3.8 percent was below. However, Hamilton-Wentworth at 6.4 percent and Niagara at 5.3 percent were well above the provincial average.

Child Welfare

In March 1978, the children in care numbered 13,615 or 3.1 percent more than in March 1977. More specifically, children in paid institutions increased by 26.0 percent, while children on adoption probation declined by 6.1 percent.

Distribution of children by age and type of wardship showed a wide variation in trends. Non-wards of all ages increased, the largest (33.9 percent) being among children 13 to 17 years old. Society wards reported a 13.9 percent increase for children 13 to 17 years old, 9.8 percent decline for children between 7 and 12 years of age and 4.3 percent drop for children below 7 years of age. Crown wards, however, showed a general decline of all ages, the largest (4.5 percent) being among children between 7 to 12 years of age.

The breakdown for the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton to a high of 2.0 percent in Kenora. When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in York, Durham and Peel to a high of 3.7 percent in Kenora and 2.2 percent in Kapuskasing. The overall average was 0.9 percent. The largest centres, Toronto and Hamilton (both with two societies combined) at 1.0 percent were slightly above the provincial average, while Ottawa-Carleton and Niagara at 0.9 percent were at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 88 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry had divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 88 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance data provided in the Bulletin cover municipalities with population in excess of 20,000 and all county and district administration boards. Together, they account for 54 reporting units covering about 88 percent of the total caseload in Ontario.

The caseload in June 1978 was 60,193 or 16.0 percent higher than in June 1977. The highest rates of increase were among employables, with single females showing a 30.4 percent increase and single males 27.8 percent.

Twelve-months cumulative expenditures ending June 1978 amounted to \$143.4 million or 21.8 percent more than the previous 12 months ending June 1977.

The breakdown by the Ministry's 19 administrative districts showed increases in the quarterly averages of beneficiaries in 17 districts in the first fiscal quarter ending June 1978. The highest increases were in Sudbury (38.7 percent), Kirkland Lake (31.0 percent), Lindsay (23.6 percent), Barrie (23.2 percent) and St. Catharines (22.5 percent). The declines were reported in two districts—Thunder Bay and Keewatin-Kenora—showing 9.2 and 2.2 percent respectively.

Supplementary Aid showed an increase in quarterly averages of beneficiaries in 14 districts, with an overall increase of 14.5 percent. Total expenditures increased by 21.8 percent.

Special Assistance showed an increase in quarterly averages of beneficiaries in 13 districts, with an overall increase of 42.9 percent. Total expenditures increased by 37.0 percent.

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average 1.4 percent in June 1978. This ranged from a low of 0.3 percent in Perth to a high of 3.2 percent in Prescott and Russell. In the largest administrative units the percentages were 1.9 in Toronto, 1.2 in Ottawa-Carleton, 2.2 in Hamilton-Wentworth and 1.8 in Niagara.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in June 1978 was 113,943 or 2.6 percent higher than the year before. During this period, there was an overall decline of 5.7 percent among recipients covered by the Guaranteed Annual Income System (GAINS) and a 7.2 percent increase among recipients not covered by GAINS. More specifically, the most noticeable changes in both groups were among couples, ranging from a 13.7 percent decline in the former group to a 26.3 percent increase in the latter.

Twelve-months cumulative expenditures ending June 1978 amounted to \$374.4 million or 10.7 percent more than the previous 12 months ending June 1977.

The provincial average of beneficiaries as a percentage of the assessed population was 2.8 percent in June 1978. This ranged from a low of 1.0 percent in Halton and Peel to a high of 8.2 percent in Manitoulin. In the largest administrative units, Toronto had a 2.5 percent and Ottawa-Carleton 2.6 percent—both slightly below the provincial average. Hamilton-Wentworth at 4.2 percent and Niagara at 3.5 percent were above the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as a percentage of the assessed population refers to the 54 largest reporting units. In June 1978, the overall average was 4.2 percent ranging from a low of 1.4 percent in Perth to a high of 10.9 percent in Nipissing (excluding North Bay) and 8.5 percent in Prescott-Russell. In the largest units, Toronto with 4.4 percent was slightly higher than the provincial average, while Ottawa-Carleton with 3.8 percent was below. However, Hamilton-Wentworth at 6.4 percent and Niagara at 5.2 percent were well above the provincial average.

Child Welfare

In June 1978, the children in care numbered 13,762 or 3.4 percent more than in June 1977. More specifically, children in paid institutions increased by 27.4 percent, while children in adoption probation homes declined by 1.9 percent.

Distribution of children by age and type of wardship showed a wide variation in trends. Non-wards of all ages increased, the highest (22.2 percent) being among children 13 to 17 years old. Society wards reported a 27.6 percent increase for children between 13 and 17 years of age and a decline of 12.2 and 3.6 percent for children 7 to 12 years old and those below 7 years of age respectively. However, crown wards showed a general decline of all ages, the most noticeable (6.0 percent) being among children 7 to 12 years of age.

The breakdown of the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton to a high of 1.7 percent in Kenora. When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.5 percent in Haldimand-Norfolk, York, Durham and Peel to a high of 3.7 percent in Kenora and 2.7 percent in Kapuskasing. The overall average was 0.9 percent. The largest centres, Toronto and Hamilton (both with two societies combined) at 1.1 percent and Ottawa-Carleton at 1.0 percent, were slightly above the provincial average, while Niagara at 0.9 percent was at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 88 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry had divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 88 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance statistics provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for 54 reporting units covering about 88 percent of the total caseload in Ontario.

The caseload in September 1978 was 58,723 or 10.7 percent higher than in September 1977. The highest rates of increase were among employables, particularly single females, showing a 24.2 percent rise in comparison with September of the previous year. The increases for other employable groups fluctuated between 11.6 and 13.3 percent. The increases in the unemployable categories ranged from 7.5 percent for male headed family units to 10.0 percent for single males.

Twelve-months cumulative expenditures ending September 1978 amounted to \$150.9 million or 23.0 percent more than the previous 12 months ending September 1977.

The breakdown by the Ministry's 19 administrative districts showed increases in the quarterly averages of beneficiaries in 18 districts in the second fiscal quarter ending September 1978. The highest increases were in Sudbury (29.1 percent) and Keewatin-Kenora (26.8 percent). The only district that reported a decline (29.1 percent) was London.

Supplementary Aid showed an increase in quarterly averages of beneficiaries in 10 districts with an overall increase of 13.4 percent. This was accompanied by a 21.9 percent increase in expenditures.

The increases in quarterly averages of beneficiaries under the Special Assistance program were reported in 10 districts, with an overall increase of 18.2 percent. Total expenditures increased by 16.6 percent.

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average 1.4 percent in September 1978. This ranged from a low of 0.4 percent in Middlesex, Huron and Kent to a high of 2.9 percent in Prescott and Russell. In the largest administrative units the percentages were 1.8 in Toronto, 1.3 in Ottawa-Carleton, 2.3 in Hamilton-Wentworth and 1.6 in Niagara.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in September 1978 was 113,736 or 2.3 percent higher than the year before. During this period, there was an overall decline of 6.4 percent among recipients covered by the Guaranteed Annual Income System (GAINS) and a 6.7 percent increase among recipients not covered by GAINS. More specifically, the most noticeable changes in both groups were among couples, with a 28.0 percent increase for those without GAINS and a 16.3 percent decline for those under GAINS.

Twelve-months cumulative expenditures ending September 1978 amounted to \$374.0 million or 7.2 percent more than the previous 12 months ending September 1977.

The provincial average of beneficiaries as a percentage of the assessed population was 2.8 percent in September 1978. This ranged from a low of 1.0 percent in Perth and Peel to a high of 8.1 percent in Manitoulin and 7.6 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto and Ottawa-Carleton with 2.5 percent were slightly below the provincial average, while Hamilton-Wentworth with 4.1 percent and Niagara with 3.4 percent were above the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as a percentage of the assessed population refers to the 54 largest reporting units. In September 1978, the overall average was 4.2 percent, ranging from a low of 1.5 percent in Perth and Peel to a high of 11.2 percent in Nipissing (excluding North Bay) and 8.6 percent in Kingston. In the largest units, Toronto had 4.3 percent or slightly more than the provincial average, while Ottawa-Carleton had 3.8 percent or somewhat less. However, Hamilton-Wentworth at 6.4 percent and Niagara at 5.0 percent were well above the provincial average.

Child Welfare

In September 1978, the children in care numbered 13,826 or 4.4 percent more than in September 1977. More specifically, children in paid institutions increased by 26.1 percent, while children in group homes declined by 4.4 percent.

Distribution of children by age and type of wardship showed a wide variation in trends. Non-wards of all ages increased, the highest (15.8 percent) being among children 13 to 17 years old. Society wards reported a substantial increase (26.5 percent) for children between 13 and 17 years of age and a small decline (3.1 percent) for children 7 to 12 years old. Crown wards, on the other hand, showed small changes for all ages.

The breakdown of the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton to a high of 1.8 percent in Kenora. When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in York to a high of 3.7 percent in Kenora. The overall average was 0.9 percent. The largest centres, Toronto, Hamilton (both with two societies combined) and Ottawa at 1.0 percent, were slightly above the provincial average, while Niagara at 0.9 percent was at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 88 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry has divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 88 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance statistics provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for 54 reporting units covering about 88 percent of the total caseload in Ontario.

The caseload in December 1978 was 61,556, or 4.4 percent higher than in December 1977. The highest rates of increase were among employable females, showing a 15.7 percent rise for female headed family units and a 12.6 percent increase for single females. In the unemployable categories, the increases ranged from 3.2 percent for female headed family units to 8.0 percent for single males.

Twelve-months cumulative expenditures ending December 1978 amounted to \$155.9 million or 21.3 percent more than the previous 12 months ending December 1977.

The breakdown by the Ministry's 19 administrative districts showed increases in the quarterly averages of beneficiaries in 16 districts in the third fiscal quarter ending December 1978. The highest increases were in Sudbury (47.6 percent) and Ottawa (23.1 percent), and the lowest in Toronto (0.1 percent). The largest expenditure increases were reported by Sudbury (52.1 percent), Keewatin-Kenora (40.1 percent), Toronto (22.4 percent) and Ottawa (22.2 percent).

Supplementary Aid showed an increase in quarterly averages of beneficiaries in 11 districts, with an overall increase of 13.1 percent. Total expenditures increased by 15.1 percent.

The increases in quarterly averages of beneficiaries under the Special Assistance program were reported in 13 districts, with an overall increase of 12.3 percent. However, total expenditures increased by 25.9 percent.

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average 1.5 percent in December 1978. This ranged from a low of 0.4 percent in Middlesex to a high of 3.6 percent in Prescott and Russell. In the largest administrative units, the percentages were 1.8 in Toronto, 1.3 in Ottawa-Carleton, 2.3 in Hamilton-Wentworth and 1.8 in Niagara.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in December 1978 was 112,760 or 1.1 percent higher than the year before. More specifically, there was a noticeable decline among couples (18.7 percent) and families with children (13.7 percent) covered by the Guaranteed Annual Income System (GAINS) accompanied by a large increase among couples (33.0 percent) and singles (13.8 percent) not covered by GAINS.

Twelve-months cumulative expenditures ending December 1978 amounted to \$372.6 million or 3.8 percent more than the previous 12 months ending December 1977.

The provincial average of beneficiaries as a percentage of the assessed population was 2.7 percent in December 1978. This ranged from a low of 1.0 percent in Halton, Peel and Perth to a high of 7.5 percent in Manitoulin and 7.4 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto at 2.4 percent and Ottawa-Carleton at 2.5 percent were slightly below the provincial average, while Hamilton-Wentworth at 4.1 percent and Niagara at 3.3 percent were above the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as a percentage of the assessed population refers to the 54 largest reporting units. In December 1978, the overall average was 4.2 percent, ranging from 1.5 percent in Perth and Halton to a high of 11.4 percent in Nipissing (excluding North Bay) and 8.7 percent in Kingston. In the largest units, Toronto with 4.2 percent was at the provincial average, while Ottawa-Carleton with 3.8 percent was slightly below. However, Hamilton-Wentworth at 6.4 percent and Niagara at 5.1 percent were well above the provincial average.

Child Welfare

In December 1978 the children in care numbered 13,814 or 5.2 percent more than in December 1977. More specifically, children in paid institutions increased by 26.0 percent, while children in group homes declined by 10.2 percent. Children in foster homes, which account for 55.0 percent of total children in care, increased by 4.0 percent.

Distribution of children by age and type of wardship showed a wide variation in trends. Non-wards of all ages reported a moderate increase, ranging from 5.0 percent for children between 13 and 17 years of age to 7.2 percent for those 7 to 12 years old. Society wards reported increases of 26.3 percent for children below 7 years of age, 23.2 percent for those between 13 and 17 years of age and 11.0 percent increase for children 7 to 12 years old. However, crown wards showed a decline of 3.9 percent for children between 13 to 17 years of age and an increase of 7.4 percent for those below seven.

The breakdown of the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton to a high of 1.9 percent in Kenora. When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in York and Peel to a high of 3.6 percent in Kenora. The overall average was 0.9 percent. The largest centres, Toronto and Hamilton (both with two societies combined) at 1.1 percent and Ottawa and Niagara at 1.0 percent, all were slightly above the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 88 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry has divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 88 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance statistics provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for 54 reporting units, covering about 94 percent of the total caseload in Ontario.

The caseload in March 1979 was 66,430, or 4.5 percent higher than in March 1978. The highest rates of increase were among employable females, showing a 33.8 percent jump for female-headed family units and a 9.0 percent rise for single females. In the unemployable categories, the increases ranged from 0.6 percent for female-headed family units to 7.8 percent for single males.

Twelve-months cumulative expenditures ending March 1979 amounted to \$156.9 million or 16.8 percent more than the previous 12 months ending March 1978.

The breakdown by the Ministry's 19 administrative districts showed increases in the quarterly averages of beneficiaries in 12 districts in the fourth fiscal quarter ending March 1979. The highest increases were in Sudbury (33.3 percent) and Ottawa (23.8 percent) and the lowest in Hamilton (0.1 percent). The largest expenditure increases were reported by Sudbury (48.3 percent) and Ottawa (34.1 percent).

Supplementary Aid showed a decline in quarterly averages of beneficiaries in 11 districts. However, noticeable increases in large districts more than offset the declining trend in the 11 districts, thus contributing to an overall increase in beneficiaries of 5.2 percent. Total expenditures increased by 14.3 percent.

The increases in quarterly averages of beneficiaries under the Special Assistance program were reported in 13 districts, with an overall rise of 9.5 percent. However, total expenditures increased by 17.7 percent.

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average 1.6 percent in March 1979. This ranged from a low of 0.4 percent in Huron and Perth to a high of 4.1 percent in Prescott and Russell. In the largest administrative units, the percentages were 1.9 in Toronto, 1.6 in Ottawa-Carleton and 2.3 in Hamilton-Wentworth.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of the unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in March 1979 was 111,115 or 1.3 percent lower than the year before. More specifically, there was a large decline among couples (19.1 percent) and families with children (14.8 percent) covered by the Guaranteed Annual Income System (GAINS). However, the category not covered by GAINS reported a substantial increase among couples (32.4 percent) to be offset by a noticeable decline among foster parents (12.4 percent).

Twelve-months cumulative expenditures ending March 1979 amounted to \$376.6 million or 2.2 percent more than the previous 12 months ending March 1978.

The provincial average of beneficiaries as a percentage of the assessed population was 2.7 percent in March 1979. This ranged from a low of 1.0 percent in Halton, Peel and Perth to a high of 7.3 percent in Manitoulin and 7.2 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto and Ottawa-Carleton at 2.4 percent were slightly below the provincial average, while Hamilton-Wentworth at 4.1 percent and Niagara at 3.3 percent were above the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as a percentage of the assessed population refers to the 54 largest reporting units. In March 1979, the overall average was 4.2 percent, ranging from a low of 1.4 percent in Perth to a high of 11.2 percent in Nipissing (excluding North Bay). In the largest units, Toronto with 4.3 percent was virtually at the provincial average, while Ottawa-Carleton with 4.0 percent was slightly below. However, Hamilton-Wentworth at 6.4 percent and Niagara at 5.1 percent were well above the provincial average.

Child Welfare

In March 1979 the children in care numbered 14,156 or 4.0 percent more than in March 1978. More specifically, children in paid institutions increased by 25.0 percent, while children in group homes declined by 9.7 percent. Children in foster homes, which account for 56 percent of total children in care, increased by 2.0 percent.

Distribution of children by age and type of wardship showed a wide variation in trends. Society wards reported increases for children in all three age groups, the largest being among children between 13 and 17 years of age (21.2 percent) and those below 7 years of age (20.9 percent). Non-wards showed a 10.2 percent increase for children between 7 and 12 years of age and a 1.7 percent decline for children below 7 years of age. Crown wards, on the other hand, reported a decline of 2.1 and 3.7 percent for children in age groups between 7 and 12 and 13 and 17 respectively, accompanied by a 5.9 percent increase for children below seven.

The breakdown of the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton to a high of 1.8 percent in Kenora. When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in York and Peel to a high of 3.7 percent in Kenora and 3.1 percent in Kapuskasing. The overall average was 1.0 percent. The largest centres, Toronto and Hamilton (both with two societies combined) at 1.2 percent were slightly above the provincial average, while Ottawa and Niagara with 1.0 percent were at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 94 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry has divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 94 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance data provided in the Bulletin cover municipalities with population in excess of 20,000 and all county and district administration boards. Together, they account for 54 reporting units covering about 90 percent of the total caseload in Ontario.

The caseload in June 1979 was 59,179 or 1.7 percent lower than in June 1978. More specifically, the employable singles and male headed family units declined by 12.4 and 9.5 percent respectively, to be followed by the unemployable female headed family units with a decrease of 4.6 percent. This was offset by a 35.7 percent increase among employable female headed family units.

Twelve-months cumulative expenditures ending June 1979, amounted to \$159 million or 10.9 percent more than the previous twelve months ending June 1978.

The breakdown by the Ministry's twelve area offices showed decreases in the quarterly averages of beneficiaries in 7 areas, with 5 of them located in the south-western and central regions. However, expenditure declines were reported in only 3 areas with 2 of them located in the central region.

Supplementary Aid showed an increase in quarterly averages of beneficiaries in 6 areas, with the largest increases in the Ottawa (127.7 percent) and Waterloo (104.8 percent) areas. The overall increase in beneficiaries was 10.6 percent, while total expenditures jumped to 17.5 percent.

Decreases in quarterly averages of beneficiaries under the Special Assistance program were reported by 7 area offices. The overall declines in beneficiaries was 3.9 percent and in total expenditures, 2.2 percent.

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average 1.4 percent in June 1979. This ranged from a low of 0.2 percent in Perth to a high of 3.3 percent in Prescott and Russell. In the largest administrative units, the percentages were 1.7 in Toronto, 1.6 in Ottawa-Carleton and 2.1 in Hamilton-Wentworth.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in June 1979 was 114,088 or virtually at the same level as in June 1978. More specifically, there was a substantial decline among family units, particularly couples (16.4 percent) covered by the Guaranteed Annual Income System (GAINS), to be offset by a large increase among singles (13.4 percent) and couples (27.6 percent) not covered by GAINS.

Twelve-months cumulative expenditures ending June 1979 amounted to \$381.2 million or 1.8 percent more than the previous 12 months ending June 1978.

The provincial average of beneficiaries as a percentage of the assessed population was 2.7 percent in June 1979. This ranged from a low of 1.0 percent in Halton, Peel and Perth to a high of 7.5 percent in Manitoulin and 7.2 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto at 2.5 percent and Ottawa-Carleton at 2.4 percent were slightly below the provincial average, while Hamilton-Wentworth at 4.0 percent was well above the provincial average.

The combination of Family Benefits and General Assistance beneficiaries as a percentage of the assessed population refers to the 54 largest reporting units. In June 1979, the overall average was 4.1 percent, ranging from a low of 1.3 percent in Perth to a high of 10.4 percent in Nipissing (excluding North Bay). In the largest units, Toronto with 4.2 percent and Ottawa-Carleton with 4.0 percent were virtually at the provincial average. However, Hamilton-Wentworth, at 6.1 percent, was well above the provincial average.

Child Welfare

In June 1979, the children in care numbered 14,064 or 2.2 percent more than in June 1978. More specifically, children in paid institutions increased by 15.3 percent, while children in group homes declined by 11.9 percent. Children in foster homes, which account for about 56.0 percent of total children in care, increased by 2.5 percent.

Distribution of children by age and type of wardship showed a wide variation of trends. Society wards reported increases in all age groups, the largest being among children below 7 years of age (20.0 percent) and those between 13 and 17 years of age (11.5 percent). Crown wards showed a 6.3 percent increase for children below 7 years of age and a 3.6 percent decline for those 13 to 17 years old. Non-wards, on the other hand, reported declines of 4.8 and 1.3 percent for children in age groups below 7 and between 13 and 17 respectively, accompanied by a 3.1 percent rise for children between 7 and 12 years of age.

A breakdown of the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. This ranged from a low of 0.1 percent in Halton to a high of 1.8 percent in Kenora.

When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in York and Peel to a high of 3.8 percent in Kenora and 2.9 percent in Kapuskasing. The overall average was 0.9 percent. The largest centres, Toronto and Hamilton (both with two societies combined) at 1.1 percent, and Ottawa-Carleton at 1.0 percent, were all slightly above the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 90 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The municipal units have been grouped by district. For field administration the Ministry has divided the province into 19 districts.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

ERRATA

QUARTERLY STATISTICAL BULLETIN

January-March 1979:

The percentages (General Assistance caseload) referred to on pages iv, 1 and 23 should read 90 instead of 94.

April-June 1979:

Paragraph 4 of page 1 should read as follows:

Starting with this issue, the data are presented in the form of 12 areas grouped within 4 regions to reflect the new organizational structure of the Ministry.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 90 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance statistics provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for 54 reporting units, covering about 90 percent of the total caseload in Ontario.

The caseload in September 1979 was 56,143, or 4.4 percent lower than in September 1978. More specifically, there was a 15.2 percent decline among employable male headed family units, accompanied by a 44.8 percent increase among employable female headed family units. In the unemployable category, female headed family units declined by 8.8 percent, while singles of both sexes increased by slightly more than one percent.

Twelve-months cumulative expenditures ending September 1979 amounted to \$164.4 million or 8.9 percent more than the previous 12 months ending September 1978.

The breakdown by the Ministry's four regions showed a wide variation in trends in quarterly averages of beneficiaries. For example, the Central Region reported a 12.5 percent decline, while the Southwestern Region showed a 5.5 percent decrease. However, in the Southeastern Region, there was a 7.6 percent increase and in the Northern Region, hardly any change. In general, total beneficiaries declined by 5.3 percent, while total expenditures increased by 6.4 percent.

Supplementary Aid showed an increase in quarterly averages of beneficiaries in all four regions, ranging from 1.7 percent in the Southwestern Region to 25.5 percent in the Southeastern Region. The overall increase in beneficiaries was 7.0 percent and that of expenditures, 11.4 percent.

The increases in quarterly averages of beneficiaries under the Special Assistance program were reported in three regions, with an overall rise of 7.7 percent. Total expenditures increased by 4.8 percent.

Of the assessed population in Ontario, General Assistance beneficiaries constituted an average 1.3 percent in September 1979. This ranged from a low of 0.3 percent in Perth and Middlesex to a high of 3.2 percent in Kingston and 3.0 percent in Prescott and Russell. In the largest administrative units, the percentages were 1.6 in Toronto and Ottawa-Carleton, and 2.0 percent in Hamilton-Wentworth.

Family Benefits

The data conform to the same municipal units as General Assistance but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in September 1979 was 114,072, or just 0.3 percent higher than the year before. The highest rates of increase were among couples (28.6 percent) and singles (13.2 percent) not covered by the Guaranteed Annual Income System (GAINS). This was offset by a substantial decline among couples (15.3 percent) and families with children (12.0 percent) in the category covered by GAINS, as well as foster parents (30.5 percent) without GAINS.

Twelve-months cumulative expenditures ending September 1979 amounted to \$385.9 million, or 3.2 percent more than the previous 12 months ending September 1978.

The provincial average of beneficiaries as a percentage of the assessed population was 2.7 percent in September 1979. This ranged from a low of 1.0 percent in Halton, Peel and Perth to a high of 7.4 percent in Manitoulin and 7.1 percent in Nipissing (excluding North Bay).

In the largest administrative units, Toronto and Ottawa-Carleton at 2.4 percent were slightly below the provincial average, while Hamilton-Wentworth at 3.9 percent and Niagara at 3.3 percent were above the provincial average.

The combination of General Assistance and Family Benefits beneficiaries as a percentage of the assessed population refers to the 54 largest reporting units. In September 1979, the overall average was 4.0 percent, ranging from a low of 1.3 percent in Perth to a high of 10.3 percent in Nipissing (excluding North Bay). In the largest units, Toronto and Ottawa-Carleton at 4.0 percent were at the provincial average, while Hamilton-Wentworth at 6.0 percent and Niagara at 4.7 percent were above the provincial average.

Child Welfare

In September 1979, the children in care numbered 13,847, remaining virtually at the same level as in September 1978. More specifically, children in paid institutions and in adoption probation homes increased by 8.1 and 5.8 percent respectively, while children in group homes declined by 7.8 percent.

Distribution of children by age and type of wardship showed a wide variation of trends. There was a small decline in non-wards of all ages, ranging from 2.7 percent for children between 7 and 12 years of age to 5.3 percent for those in the 13 to 17 years age group. Society wards reported a 7.6 percent decline for children between 7 and 12 years of age and a small increase (between 1.4 and 1.8 percent) for children in two other age groups. Crown wards, on the other hand, showed a substantial increase (13.5 percent) for children below 7 years of age and a 1.7 percent decline for children between 13 and 17 years of age.

The breakdown of the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. This ranged from a low of 0.2 percent in Durham and Halton to a high of 2.0 percent in Kenora. When protection and other community services were included, the beneficiaries as a percentage of the total population ranged from a low of 0.4 percent in York and Peel to a high of 3.9 percent in Kenora and 2.9 percent in Kapuskasing. The overall average was 1.0 percent. The largest centres, Toronto and Hamilton (both with two societies combined) at 1.1 percent were slightly above the provincial average, while Ottawa and Niagara at 1.0 percent were at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 90 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The data are presented in the form of 12 areas grouped within 4 regions to reflect the new organizational structure of the Ministry.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 90 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance data provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for 54 reporting units covering about 90 percent of the total caseload in Ontario.

The caseload in December 1979 was 62,210 or 1.1 percent higher than in December 1978. The highest rates of increase were among employable females, showing a 64.9 percent jump for female headed family units and a 5.8 percent rise for single females. In the unemployable category, female headed family units declined by 6.8 percent, while single females increased by 4.7 percent.

Twelve-months cumulative expenditures, ending December 1979, amounted to \$167.4 million or 7.4 percent more than the previous twelve months ending December 1978.

The breakdown by the Ministry's four regional offices showed declines in quarterly averages of beneficiaries in three regions, the most noticeable being in the Central Region (9.5 percent). However, all four regions reported increases in expenditures, the largest being in the Southeastern Region (21.7 percent).

Supplementary Aid showed an increase in quarterly averages of beneficiaries in two regions and a decline in two. A substantial decline (30.8 percent) was reported by the Southeastern Region and a noticeable increase (12.8 percent) by the Central Region. The overall increase in beneficiaries was only 0.3 percent, while total expenditures increased by 7.2 percent.

Under the Special Assistance program, quarterly averages of beneficiaries declined somewhat in the Southwestern and Southeastern Regions, while showing more noticeable increases in the Central and Northern Regions, which were reflected in an overall increase of 4.3 percent. Total expenditures, however, remained at the same level.

Of the total population in Ontario, General Assistance beneficiaries constituted an average 1.5 percent in December 1979. This ranged from a low of 0.4 percent in Perth to a high of 3.8 percent in Prescott and Russell. In the largest administrative units, the percentages were 1.6 in Toronto, 1.8 in Ottawa-Carleton and 2.3 in Hamilton-Wentworth.

Family Benefits

Family Benefits statistics cover the same municipal units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in December 1979 was 113,274 or 0.5 percent higher than in December 1978. More specifically, There were substantial increases among couples (21.5 percent) and singles (11.9 percent), accompanied by a large decline (33.0 percent) among foster parents, all outside the Guaranteed Annual Income System (GAINS). Recipients of benefits under GAINS declined in all groups, with substantial changes among couples (14.2 percent) and families with children (10.8 percent).

Twelve-months cumulative expenditures ending December 1979 amounted to \$390.6 million or 4.8 percent more than the previous 12 months ending December 1978.

The provincial average of beneficiaries as a percentage of the total population in Ontario was 2.6 percent in December 1979. This ranged from a low of 1.0 percent in Halton, Peel and Perth to a high of 7.1 percent in Manitoulin and 6.9 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto and Ottawa-Carleton at 2.4 percent were slightly below the provincial average, while Hamilton-Wentworth at 3.9 percent was well above.

The combination of Family Benefits and General Assistance beneficiaries, as a percentage of the total population, refers to the 54 largest reporting units. In December 1979, the overall average was 4.1 percent, ranging from a low of 1.4 percent in Perth to a high of 10.2 percent in Nipissing (excluding North Bay). In the largest units, Toronto with 4.0 percent was slightly below and Ottawa-Carleton with 4.2 percent, slightly above the provincial average. However, Hamilton-Wentworth, at 6.1 percent, was well above the provincial average.

Child Welfare

In December 1979, the children in care numbered 13,996 or 1.3 percent more than in December 1978. More specifically, children in adoption probation homes increased by 15.6 percent, while children in group homes declined by 2.0 percent. Children in foster homes, which account for about 55.0 percent of total children in care, remained virtually at the same level.

Distribution of children by age and type of wardship showed a wide variation of trends. Society wards reported declines in all age groups, the largest (13.4 percent) being among children between 13 and 17 years of age and those below 7 years of age (8.8 percent). Crown wards showed a substantial (16.4 percent) increase for children below 7 years of age and negligible increases for two other age groups. Non-wards reported a 10.3 percent increase for children between 7 and 12 years of age, a 4.3 percent rise for children in the age group 13 to 17 years, and a negligible increase (0.7 percent) for those below 7 years of age.

A breakdown of 50 societies showed an average 0.4 percent of children in care of the Ontario population under the age of 19. This ranged from a low of 0.2 percent in Durham and Halton to a high of 2.0 percent in Kenora.

When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in York and Peel to a high of 4.1 percent in Kenora and 2.8 percent in Kapuskasing. The overall average was 1.0 percent. The largest centres, Toronto and Hamilton (both with two societies combined), at 1.1 percent, were slightly above the provincial average, while Ottawa-Carleton at 1.0 percent was at the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 90 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The data are presented in the form of 12 areas grouped within 4 regions to reflect the new organizational structure of the Ministry.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 90 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Highlights

General Assistance

General Assistance data provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for 54 reporting units, covering about 90 percent of the total caseload in Ontario.

The caseload in March 1980 was 68,718 or 3.4 percent higher than in March 1979. The highest rate of increase was among employable female-headed families, showing a 65.2 percent jump. However, other employable categories showed moderate increases, ranging from 1.3 percent for male-headed family units to 8.4 percent for single males. In the unemployable group, the family units declined by little more than 4 percent, while singles showed slight increases.

Twelve-months cumulative expenditures ending March 1980 amounted to \$168.9 million or 7.6 percent more than the previous twelve months ending March 1979.

The breakdown by the Ministry's four regional offices showed wide variations in quarterly averages of beneficiaries, the most noticeable being in the Southeastern Region with a 16.6 percent increase and in the Northern Region with a 6.6 percent decline. The expenditures also varied widely, with the Northern Region showing a 1.7 percent decline and the Southeastern Region a 24.8 percent increase.

Supplementary Aid showed an increase in quarterly averages of beneficiaries in three regions, the highest (57.0 percent) being in the Southeastern Region. The overall increase in beneficiaries was 17.2 percent, while total expenditures increased by 25.7 percent.

Under the Special Assistance program, quarterly averages of beneficiaries declined in three regions, the largest (21.9 percent) being in the Northern Region. This was offset by a 1.7 percent increase in the Southwestern Region and by a small decline (5.0 percent) in the Central Region, reflecting an overall decline of 3.9 percent. Total expenditures, however, increased by 27.8 percent.

Of the total population in Ontario, General Assistance beneficiaries constituted an average 1.6 percent in March 1980. This ranged from a low of 0.4 percent in Perth and Cochrane to a high of 3.9 percent in Prescott and Russell. In the largest administrative units, the percentages were 1.7 in Toronto, and 2.1 in Ottawa-Carleton and Hamilton-Wentworth.

Family Benefits

Family Benefits statistics cover the same municipal units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in March 1980 was 115,038 or 3.5 percent higher than in March 1979. More specifically, there were substantial increases among couples (23.2 percent) and singles (12.3 percent) not covered by the Guaranteed Annual Income System (GAINS), accompanied by noticeable declines among couples (13.2 percent) and families with children (8.2 percent) in the category covered by GAINS.

Twelve-months cumulative expenditures ending March 1980 amounted to \$389.7 million or 3.5 percent more than the previous 12 months ending March 1979.

The provincial average of beneficiaries as a percentage of the total population in Ontario was 2.6 percent in March 1980. This ranged from a low of 0.9 percent in Perth to a high of 7.3 percent in Manitoulin and 7.1 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto and Ottawa-Carleton at 2.4 percent were slightly below the provincial average, while Hamilton-Wentworth at 3.9 percent was well above.

The combination of Family Benefits and General Assistance beneficiaries as a percentage of the total population refers to the 54 largest reporting units. In March 1980, the overall average was 4.2 percent, ranging from a low of 1.4 percent in Perth to a high of 10.6 percent in Nipissing (excluding North Bay). In the largest units, Toronto with 4.2 percent was at the provincial average, while Ottawa-Carleton with 4.5 percent was slightly above and Hamilton-Wentworth with 6.1 percent was well above the provincial average.

Starting with this issue, four new statistical tables are provided in this section as a result of the introduction of the Work Incentive program in January 1980. This program is designed to provide positive financial incentives for recipients of long-term social assistance to return to full-time employment.

Child Welfare

In March 1980, the children in care numbered 14,135 or 0.1 percent less than in March 1979. More specifically, children in adoption probation homes increased by 23.4 percent, while children in paid institutions showed only a 1.4 percent rise. Children in foster homes, which account for about 55 percent of total children in care, declined by 2.4 percent. Children in group homes and other locations also showed some decreases.

Distribution of children by age and wardship showed a wide variation of trends. Society wards reported declines in all age groups, the largest (14.0 percent) being among children below 7 years of age. Crown wards, however, showed increases in all age groups, with a substantial change (20.2 percent) for children below 7 years of age.

Non-wards, on the other hand, reported a 4.4 percent decrease for children between 13 and 17 years of age and a negligible increase for those below 13 years of age.

A breakdown of the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. The Northern Region at 0.6 percent, was above the provincial average, while the Southwestern Region at 0.3 percent, was slightly below. The other two regions were at the provincial average.

When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in York and Peel to a high of 4.3 percent in Kenora and 3.0 percent in Kapuskasing. The overall average was 0.9 percent. The largest centres, Toronto and Hamilton (both with two societies combined) at 1.1 percent and Ottawa-Carleton at 1.0 percent, were slightly above the provincial average.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 90 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The data are presented in the form of 12 areas grouped within 4 regions to reflect the new organizational structure of the Ministry.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 90 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance data provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for about 90 percent of the total caseload in Ontario.

The caseload in June 1980 was 62,863 or 6.2 percent higher than in June 1979. The highest rate of increase was among employable family units, showing a 55.5 percent jump for females and a 12.2 percent rise for males. Other categories showed moderate increases, ranging from 1.6 to 5.7 percent.

Twelve-months cumulative expenditures ending June 1980 amounted to \$175.4 million or 10.3 percent more than the previous twelve months ending June 1979.

The breakdown by the Ministry's four regional offices showed wide variations in quarterly averages of beneficiaries, the most noticeable being in the Southeastern Region with a 13.0 percent increase and in the Northern Region with a 10.1 percent decline. The expenditures, however, showed substantial increases in the Southeastern (24.5 percent) and Southwestern (18.2 percent) Regions, followed by a somewhat smaller increase (14.3 percent) in the Central Region and a 2.2 percent decline in the Northern Region.

Supplementary Aid showed an increase in quarterly averages of beneficiaries in the Central (10.2 percent) and Southwestern (6.7 percent) Regions, a decline in the Northern Region (7.3 percent), and virtually no change in the Southeastern Region. The overall increase in beneficiaries was 6.3 percent, which was reflected in total expenditures of 6.5 percent.

Under the Special Assistance program, quarterly averages of beneficiaries increased in the Southwestern (8.0 percent) and Southeastern (5.6 percent) Regions. This was offset by a substantial decline (14.0 percent) in the Northern Region, resulting in an overall increase of 1.7 percent. Total expenditures, however, increased by 11.7 percent.

In relation to the total population of Ontario, General Assistance beneficiaries constituted an average 1.5 percent in June 1980. This ranged from a low of 0.4 percent in Middlesex, Halton and Perth to a high of 3.3 percent in Kingston and Prescott and Russell. In the largest administrative units, the percentages were 1.7 in Toronto, 1.9 in Ottawa-Carleton, 2.2 in Hamilton-Wentworth and 0.5 percent in Peel.

Family Benefits

Family Benefits statistics cover the same municipal units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in June 1980 was 114,396 or virtually at the same level as in June 1979. More specifically, there was a noticeable decline among recipients covered by the Guaranteed Annual Income System (GAINS), the largest being among couples (12.5 percent) and families with children (10.8 percent). In the category without GAINS, the couples showed an increase of 18.4 percent and singles, 9.1 percent. However, families with children, which account for about 44 percent of the total caseload, showed a 1.4 percent decline.

Twelve-months cumulative expenditures ending June 1980 amounted to \$398.7 million or 4.6 percent more than the previous 12 months ending June 1979.

The provincial average of beneficiaries as a percentage of the total population in Ontario was 2.6 percent in June 1980. This ranged from a low of 0.9 percent in Peel and Perth to a high of 7.0 percent in Manitoulin and Nipissing (excluding North Bay). In the largest administrative units, Toronto at 2.4 percent and Ottawa-Carleton at 2.3 percent were slightly below the provincial average. Hamilton-Wentworth, at 3.9 percent, was well above and Peel, at 0.9 percent, was far below the provincial average.

The combination of Family Benefits and General Assistance beneficiaries as a percentage of the total population refers to the 54 largest reporting units. In June 1980, the overall average was 4.1 percent, ranging from a low of 1.3 percent in Perth to a high of 10.2 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto with 4.1 percent was at the provincial average, while Ottawa-Carleton with 4.2 percent was slightly above. However, Hamilton-Wentworth at 6.0 percent was well above the provincial average and Peel at 1.5 percent was far below.

Child Welfare

In June 1980, the children in care numbered 13,829 or 1.7 percent less than in June 1979. More specifically, children in adoption probation homes increased by 36.1 percent, while children in foster homes, which account for about 54 percent of total children in care, declined by 5.7 percent. Children in group homes, paid institutions and other locations also showed increases, ranging from 3.0 to 4.3 percent.

Distribution of children by age and wardship showed a wide variation of trends. For example, society wards reported declines in all age groups, the largest (18.8 percent) being among children below 7 years of age. Crown wards, however, reported a 17.1 percent increase for children below 7 years of age, followed by a 4.2 percent rise for those between 12 and 13 years of age. There was no change for children between 13 and 17 years of age. Non-wards, on the other hand, showed a decline of 12.0 percent for children 13 to 17 years old and a 5.1 percent increase for children below 7 years of age.

A breakdown of the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. The Northern Region, at 0.6 percent, was above the provincial average, while the Southwestern Region, at 0.3 percent, was slightly below. The other two regions were at the provincial average.

When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 in York to a high of 3.3 percent in Kenora. The overall average was 0.9 percent. The largest centres, Toronto and Hamilton (both with two societies combined) at 1.1 percent and Ottawa-Carleton at 1.0 percent, were slightly above the provincial average, while Peel at 0.5 percent was far below.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 90 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The data are presented in the form of 12 areas grouped within 4 regions to reflect the new organizational structure of the Ministry.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 90 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (31) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

General Assistance

General Assistance data provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together, they account for about 86 percent of the total caseload in Ontario.

The caseload in September 1980 was 63,429 or 13.0 percent higher than in September of the previous year. The unemployable singles category, which accounts for 33 percent of the total caseload, is worth noting. It showed an increase of 13.7 percent for males and 11.8 percent for females. There was a similar (12.5 percent) increase among employable single males, which, together with the above mentioned category, reflected the overall trend in caseload.

Twelve-months cumulative expenditures ending September 1980 amounted to \$183.8 million or 13.9 percent more than the previous twelve months ending September 1979.

The breakdown by the Ministry's four regional offices showed noticeable increases in quarterly averages of beneficiaries in three regions, with the highest increase (16.2 percent) in the Southwestern Region. The Northern Region, however, declined by 3.8 percent. The expenditures increased in all four regions, the largest (28.7 percent) being in the Southwestern Region and the lowest (7.3 percent) in the Northern Region.

Supplementary Aid showed an increase in quarterly averages of beneficiaries in the Central (2.6 percent) and Southwestern (4.8 percent) Regions and a decline in the Northern (9.6 percent) and Southeastern (4.4 percent) Regions. The overall increase in beneficiaries was 1.9 percent. Total expenditures rose by 4.7 percent.

Under the Special Assistance program, quarterly averages of beneficiaries declined in three regions, the largest (19.7 percent) being in the Northern Region and the lowest (3.6 percent) in the Southeastern Region. The Southwestern Region, however, showed a 10.0 percent increase, thereby alleviating an overall decline to 4.9 percent. Total expenditures increased by 9.3 percent.

Of the total population in Ontario, General Assistance beneficiaries constituted an average 1.5 percent in September 1980. This ranged from a low of 0.4 percent in Halton, Prince Edward, Middlesex and Perth to a high of 3.3 percent in Kingston and Prescott and Russell. In the largest administrative units, the percentages were 1.7 in Toronto, 1.9 in Ottawa-Carleton, 2.3 in Hamilton-Wentworth and 0.6 in Peel.

Family Benefits

Family Benefits data cover the same municipal units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in September 1980 was 115,420 or 1.2 percent higher than in September 1979. More specifically, there was a noticeable decline among recipients covered by the Guaranteed Annual Income System (GAINS), the largest being among couples (13.0 percent) and families with children (10.7 percent). The category without GAINS showed an increase of 16.8 percent among couples, 9.1 percent among singles and only 0.5 percent for families with children.

Twelve-months cumulative expenditures ending September 1980 amounted to \$407.9 million or 5.7 percent more than the previous 12 months ending September 1979.

The provincial average of beneficiaries as a percentage of the total population in Ontario was 2.6 percent in September 1980. This ranged from a low of 0.9 percent in Peel and Perth to a high of 7.0 percent in Nipissing (excluding North Bay) and 6.9 percent in Manitoulin. In the largest administrative units, Toronto at 2.4 percent and Ottawa-Carleton at 2.3 Percent were slightly below the provincial average, while Hamilton-Wentworth at 3.9 percent was well above and Peel at 0.9 percent—well below the provincial average.

The combination of Family Benefits and General Assistance beneficiaries as a percentage of the total population refers to the 54 largest reporting units. In September 1980, the overall average was 4.1 percent, ranging from a low of 1.3 percent in Perth to a high of 10.2 percent in Nipissing (excluding North Bay). In the largest units, Toronto at 4.2 and Ottawa-Carleton at 4.3 percent, were slightly above the provincial average, while Hamilton-Wentworth at 6.2 percent was well above and Peel at 1.6 percent was far below the provincial average.

Child Welfare

In September 1980, the children in care numbered 13,446 or 2.9 percent less than in September 1979. More specifically, children in adoption probation homes increased by 14.4 percent while children in foster homes and paid institutions declined by 4.5 and 5.6 percent respectively.

Distribution of children by age and wardship showed a wide variation of trends. For example, society wards reported declines in all age groups, the largest (13.7 percent) being among children below 7 years of age. Crown wards, however, showed a 5.4 percent increase for children below 7 years of age and a 1.4 percent decline for children between 13 and 17 years of age. Non-wards, on the other hand, reported a substantial (16.0 percent) decrease for children in the 13 to 17 years age group and a small (2.1 percent) increase for those below 7 years of age.

A breakdown of the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. The Northern Region, at 0.6 percent, was above the provincial average, while the Southwestern Region, at 0.3 percent, was slightly below. The other two regions were at the provincial average.

When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in York and Peel to a high of 3.6 percent in Kenora. The overall average was 0.9 percent. The largest centres, Toronto and Hamilton—both with two societies combined—and Ottawa-Carleton (all at 1.1 percent) were slightly above the provincial average, while Peel, at 0.4 percent was far below.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The data are presented in the form of 12 areas grouped within 4 regions to reflect the new organizational structure of the Ministry.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (35) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Highlights

General Assistance

General Assistance data provided in the Bulletin cover municipalities with populations in excess of 20,000 and all county and district administration boards. Together they account for about 86 percent of the total caseload in Ontario.

The caseload in December 1980 was 67,454 or 8.4 percent higher than in December of the previous year. The category of unemployable singles showed the largest increase - 15.4 percent for males and 10.8 percent for females. Similar changes were reported for employable family units, showing increases of 14.9 percent for males and 10.1 percent for females.

Twelve-months cumulative expenditures ending December 1980 amounted to \$191.8 million or 16.5 percent more than the previous twelve months ending December 1979.

The breakdown by the Ministry's four regional offices showed increases in quarterly averages of beneficiaries in three regions, the highest - 16.1 percent - being in the Southwestern Region. The expenditures increased in all four regions, the largest - 24.6 percent - was in the Southwestern Region and the lowest - 7.0 percent - in the Northern Region.

Supplementary Aid showed small increases in quarterly averages of beneficiaries in the Southeastern (1.1 percent) and Southwestern (1.7 percent) Regions, and negligible declines in the Northern (0.5 percent) and Central (0.4 percent) Regions. The overall increase in beneficiaries was 0.7 percent, and in total expenditures - 4.7 percent.

Under the Special Assistance program, quarterly averages of beneficiaries declined in Northern Region by 21.1 percent and in Southeastern Region by 9.0 percent. The Central and Southwestern Regions showed increases of 1.6 and 9.6 percent respectively. The overall increase in beneficiaries was 1.2 percent and in the expenditures - 2.1 percent.

Of the total population in Ontario, General Assistance beneficiaries constituted an average 1.6 percent in December 1980. This ranged from a low of 0.4 percent in Perth to a high of 4.1 percent in Prescott and Russell. In the largest administrative units, the percentages were 1.7 in Toronto, 2.0 in Ottawa-Carleton, 2.5 in Hamilton-Wentworth and 0.6 in Peel.

Family Benefits

Family Benefits statistics cover the same municipal units as General Assistance, but with the addition of unconsolidated counties and districts to reflect the distribution of the entire province.

The total caseload in December 1980 was 116,114 or 2.8 percent higher than in December of the previous year. More specifically, there was a general decline among recipients covered by the Guaranteed Annual Income System (GAINS), the largest being among couples (11.1 percent) and families with children (9.3 percent). The category without GAINS showed increases of 20.6 percent among couples, 10.5 percent among singles and only 2.9 percent among families with children.

Twelve-months cumulative expenditures ending December 1980 amounted to \$419.8 million or 7.5 percent more than the previous 12 months ending December 1979.

The provincial average of beneficiaries as a percentage of the total population in Ontario was 2.6 percent in December 1980. This ranged from a low of 1.0 percent in Peel, Perth and Halton to a high of 6.8 percent in Nipissing (excluding North Bay) and 6.7 percent in Manitoulin. In the largest administrative units, Toronto at 2.4 percent and Ottawa-Carleton at 2.3 percent, were slightly below the provincial average; Hamilton-Wentworth, at 3.9 percent, was well above and Peel, at 1.0 percent, was far below the provincial average.

The combination of Family Benefits and General Assistance beneficiaries as a percentage of total population refers to the 54 largest reporting units. In December 1980, the overall average was 4.2 percent, ranging from a low of 1.4 percent in Perth to a high of 10.4 percent in Nipissing (excluding North Bay). In the largest administrative units, Toronto, at 4.1 percent, was slightly below the provincial average, while Ottawa-Carleton, at 4.3 percent, was slightly above. However, Hamilton-Wentworth, at 6.4 percent, was well above the provincial average and Peel, at 1.6 percent, was far below.

Child Welfare

In December 1980, the children in care numbered 13,033 or 6.9 percent less than in December 1979. More specifically, children in group homes declined by 11.1 percent and those in other locations - by 13.5 percent. Children in adoption probation homes showed a slight increase (1.0 percent) while children in foster homes and paid institutions declined by 6.2 and 5.9 percent respectively.

Distribution of children by age and wardship showed a general decline for virtually all ages. Non-wards reported a substantial decline (25.7 percent) for children between 13 and 17 years of age. Society wards showed a 21.4 percent decrease for children below 7 years of age, while crown wards reported an increase of 1.0 percent for children between 7 and 12 years of age and a decline of 3.6 percent for those between 13 and 17 years of age.

A breakdown of the 50 societies showed an average 0.4 percent of children in care of the assessed population under the age of 19. The Northern Region, at 0.6 percent, was above the provincial average; Central Region was at the provincial average; and two other regions, at 0.3 percent, were slightly below.

When protection and other community services were included, the beneficiaries as a percentage of total population ranged from a low of 0.4 percent in York to a high of 3.7 percent in Kenora. The overall average was 0.9 percent. The largest centres, Toronto and Hamilton (both with two societies combined) as well as Ottawa-Carleton - all were slightly above the provincial average, while Peel, at 0.5 percent, was far below.

General Welfare Assistance

Notes

The General Welfare Assistance Act provides for cost sharing of social assistance that is administered to individuals and families in need by the municipal governments. Under this act General Assistance is the main income maintenance programme for people who are in short term or emergency need. In addition, two other assistance programmes under this act have been included in the tables of this section. They are Supplementary Aid and Special Assistance for people with particular needs which exceed their main sources of income.

In this section only, the tables cover most but not the complete population of the province. All the 54 larger and consolidated municipal administrations have been included, i.e., municipalities with populations over 20,000, county welfare units and district administration boards. Together they account for about 86 percent of the General Assistance caseload.

The term "beneficiary" is more comprehensive than the term "case" because it includes dependents, i.e., all family members who are included in the payment calculations.

The data are presented in the form of 12 areas grouped within 4 regions to reflect the new organizational structure of the Ministry.

For comparisons with the corresponding period in the previous year, monthly averages for fiscal quarters are given in tables three, five and seven. This is done to give more reliable comparisons than the respective comparisons of individual months in other tables.

All tables in this part are based on unaudited figures as given by municipal governments. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.

Family Benefits

Notes

The Family Benefits Act provides for people who are likely to need social assistance for a longer term. They include the disabled and families where the father is absent or disabled. This programme is administered directly by the Ministry.

The tables give figures for the same municipal units which cover about 86 percent of the General Assistance caseload. However, the district totals are complete for Family Benefits and account for 100 percent.

The term "beneficiary" is more comprehensive than the term "case" because it includes all family members who are included in the payment calculations. Foster Parents are not themselves beneficiaries but care for one or more children who are beneficiaries.

Both caseload and expenditure figures are preliminary and based on cheques issued. The figures are subject to later correction and adjustment for returned cheques, under and over payments, etc. Not included are expenditures for health and dental care. The figures should be read as approximations which give general indications of volumes and trends.

Child Welfare

Notes

The Child Welfare Act is administered by the 50 Children's Aid Societies with funds from the provincial and municipal governments. Generally, each Society serves one or more counties or districts. One exception is the District of Cochrane where the Kapuskasing Society serves the northern portion and the Porcupine one the southern. The other exceptions are Essex, Hamilton and Toronto which have second Societies which are Catholic.

In the final table (35) beneficiaries are defined as the total of children receiving protection and prevention services and all other types of cases.

All tables in this part are based on reports from the Children's Aid Societies. They are subject to later corrections and adjustments and should be read as approximations which give general indications of volumes and trends.
